

Harshit Sharma

Dharmendra Kumar

Team: Data

Category- Troubleshooter

Solving incentive allocation problem for supply is not an easy task given the diversity of supply across various cities. Both Harshit and Dharmendra have been instrumental in building the incentive allocator and bringing it to the state that it is currently in. Countless experiments and validations later, iAllocator is currently live in 4 cities, something which wouldn't have been possible without Harshit and Dharmendra.
